

8th grade Elective: Basic HTML – Mr. Mistishen

- Purpose: This elective is open to students who want to learn how to create web pages using Microsoft Notepad and a web browser such as Microsoft Internet Explorer. This club is NOT for computer games or surfing the Internet.
- Student role: Students are expected to participate in the lessons and demonstrations on HTML and/or desktop publishing. Students will create their own web pages and/or graphic projects such as cards, posters and banners.
- Teacher role: The teacher will prepare, present and demonstrate how to create web pages by using the Hyper Text Markup Language. The teacher will offer suggestions and answer questions concerning desktop publishing, creating web pages, and editing pictures and graphics.

Programs

- Microsoft Notepad,
- Microsoft Internet Explorer, or
- Google Chrome
