"If you have one of our computers, you really have a tight budget."

September 20, 1999

John Peterson  
Sunshine Copiers  
2257 North Broad Street  
Philadelphia, PA 19208

Dr. Mr. Peterson:

As per our conversation on Tuesday, November 17, here is the completed service contract for our new "XL-1000" copier. We have decided to purchase the three-year contract instead of the standard one-year service guarantee. A check for the \$375 total is enclosed.

Your assistant, Jerry Smith, telephoned yesterday and went over some of the specifics of the contract. It is my understanding from him that we must provide insurance protecting our office staff as well as your company in the event of damage to or destruction of the leased equipment. For your reference, our insurance company is Acme and Johnson Inc., located here in Newville.

Thank you for the extra time and consideration you have taken in handling our account. We at Economy Computers look forward to a long and fruitful association with Sunshine Copiers. And if you ever need assistance in purchasing, upgrading or maintaining your computers or network, I would be glad to personally talk with you.

Sincerely,

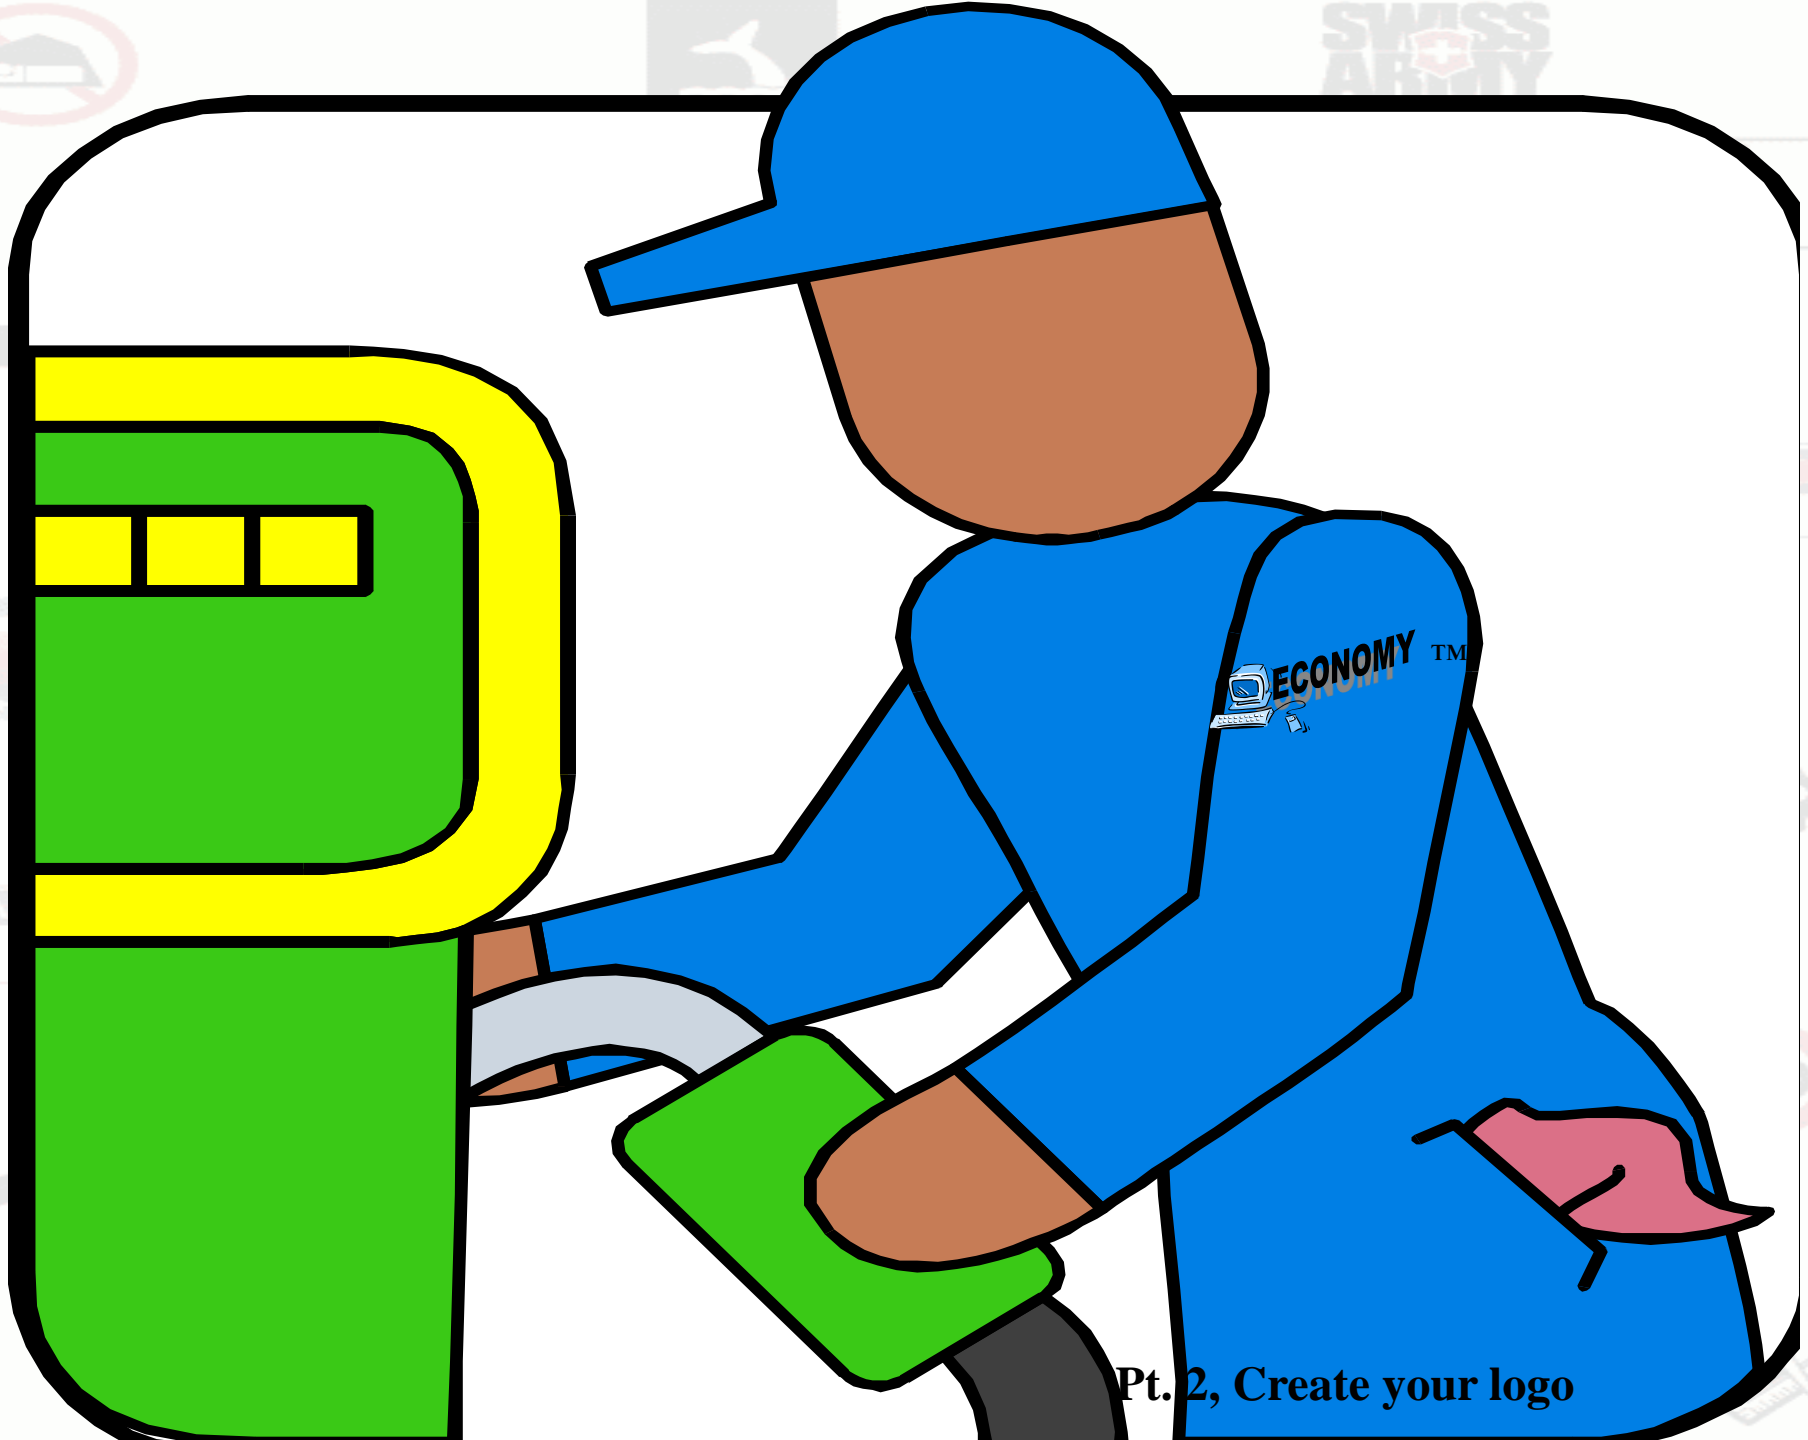

Paul Reiser, 7D4  
Economy Computers

self, but if there is enough business, I might create a separate graphics and design business for the web page design, and have the applications consulting business separate. If this happens, I will need to hire people to help me. I will make sure that my employees will receive the best benefits available.

Since other businesses are using the Internet I will use this also. I will get a domain for my company such as [www.economy.com](http://www.economy.com) and I will then have a business that's open 24 hours a day. When this happens I may need expand and have one or more offices outside of my home.
